KTech Telecommunications joins *TEAMWOOSH* – *WOOSHCOM*®'s Vendor Partnership Program

WOOSHCOM® *CORPORATION* & KTech Telecommunications, Inc. today announced that KTech has joined *WOOSHCOM*'s new vendor partnership program called *TEAMWOOSH*. Initial members of the program are KTech Telecommunications and Rohde & Schwarz, who will each be displaying *WOOSHCOM*'s DHEI /ASI MPEG-2 Interface Adapter products at their booths at CableTec in Philadelphia.

Members of *TEAMWOOSH* partner with *WOOSHCOM CORPORATION* in co-promoting the system level solutions that the combination of their products provide and in re-selling *WOOSHCOM*'s products. *WOOSHCOM*'s DHEI interface adapters extend the functionality of MPEG-2 equipment with the standard DVB-ASI interfaces into the DigiCipher® II domain. DigiCipher® II encrypted satellite feeds from legacy Motorola IRT-1000/2000 and DSR-4400X receivers may now be connected to standard DVB-ASI based equipment using *WOOSHCOM*'s miniature Model 3010 DHEI to ASI MPEG-2 Interface Adapter.

KTech Telecommunications, Inc. supplies a broad line of MPEG products that perform functions including 8-VSB modulation/demodulation, MPEG multiplexing and PSIP table management. By combining these products with WooshCom's DHEI/ASI interface adapters, DigiCipher® II encrypted MPEG streams maybe be multiplexed with off-air HD or SD MPEG-2 streams.

KTech Telecommunications is known for its excellence in professional DTV broadcast and digital cable head-end equipment. Headquartered in Chatsworth, CA, KTech leverages its unique digital design and algorithmic know-how to distribute cost effective and state-of-the-art DTV technology. As the demand for HDTV increases this baseline technology also acts as a platform for future upgrade.

About *WOOSHCOM*®

WOOSHCOM® *CORPORATION* provides innovative products to make MPEG-2 interfacing flexible and seamless. *WOOSHCOM*® has been supplying such solutions to the cable television and satellite industries since 1995. *WOOSHCOM*®, a privately held firm, is

headquartered in Denver, Colorado, and can be found on the web at www.WooshCom.com.

About KTech Telecommunications

Since 1995, privately held KTech Telecom has been producing quality broadcast products such as an 8-VSB modulator, a Static PSIP Generator, a 100W - 3KW DTV Transmitter, an 8-VSB Translator, a DTV null packet generator, an 8-VSB Professional Receiver, and an MPEG2 transport stream generator/recorder. KTech representatives can be reached by phone at (818) 773-0333 or by e-mail at sales@ktechtelecom.com KTech's website is at : <http://www.ktechtelecom.com>

DigiCipher® is a registered trademark of Motorola, Inc (formerly General Instrument, Inc.)
